Product Designer + Frontend Developer building **production-grade Generative AI creative pipelines** - from prompt to pixel-perfect, photoreal output. ~3 years shipping real products.

30 ai images | 5 products | 3 models compared | 0 studio

(flagship proof) **built + shipped + live**

The AI Photorealism Showdown

live project

Designed and built a public benchmark that puts Gemini, ChatGPT and a personal agent head to head on the same 5 product briefs - 30 AI-generated images, judged side by side. Built a character-consistency pipeline (reference-face locking so every frame keeps the same two people) with a stubborn realism checklist: candid light, film grain, real skin, zero studio. Shipped as a production Next.js site with a custom canvas hover engine, scroll-driven motion and Lighthouse-perfect best practices, accessibility and SEO scores.

AthLnk

flagship client

End-to-end product design and frontend for a sports-connection platform: 100+ component Figma design system, 48% faster load time. Design, build and delivery all owned solo.

Daily AI stack

Claude Code - builds production Next.js apps with it daily. **ChatGPT Pro** and **Gemini Pro** - prompt engineering for photoreal UGC imagery, plus model benchmarking and comparison.

GreenFrog

Mobile-first booking flow - 48% higher booking completion on 90% mobile traffic.

Foreward Golf

Logo, graphics, copy and build - 30% more inquiries, 86% faster load.

Clear Place

CRM dashboard with 40+ modules - dense enterprise UI kept clean and usable.

(core stack) **what the work runs on**

React | Next.js | TypeScript | Three.js | WebGL | GLSL | GSAP | Figma
